

JENNIFER M. GRANHOLM
GOVERNOR

STATE OF MICHIGAN
DEPARTMENT OF TRANSPORTATION
LANSING

KIRK T. STEUDLE
DIRECTOR

February 4, 2009

Mr. John D. Niemela
Director
County Road Association of Michigan
P.O. Box 12067
Lansing, Michigan 48901-2067

Mr. David Worthams
Assistant Director, State Affairs
Michigan Municipal League
320 N. Washington Sq., Ste. 100
Lansing, Michigan 48933-1288

Dear Mr. Niemela and Mr. Worthams:

LOCAL BRIDGE PROGRAM
DEADLINE FOR APPLICATIONS – JUNE 1, 2009
(Limit of Five (5) Applications per Agency)

We are soliciting applications for candidate projects for the Local Bridge Program. Selected projects will be funded during the 2012 fiscal year. Enclosed are the application requirements. Do not submit projects which cannot be committed to construction within the 2012 fiscal year. The applications must be submitted by the local agency owner. Applications received directly from a consultant will be rejected and returned to the local agency. **The total number of applications from any local agency is limited to five (5). Submitting more than five applications from one agency will be cause to reject all applications submitted.**

To be eligible for bridge funds, the structure must meet the definition of a bridge. A bridge is defined as a structure with a total clear span of more than 20 feet, measured along the centerline of the roadway over a stream, watercourse, or opening. For a span bridge, this means that the clear opening span, measured face to face of the inside of the abutments, is greater than 20 feet. Multi-unit culverts are considered bridges if the total length as measured along the centerline of the roadway is greater than 20 feet and if the distance between the culvert units is less than half the diameter of the smallest unit. This description is referenced in item number 112 of the "Michigan Structure Inventory and Appraisal Coding Guide." There are many multi-unit culverts under local agency jurisdiction that qualify as bridges, and thus, are required to be on the structure inventory and regularly inspected. Please check the multi-unit culverts in your area to see if they qualify under the "definition of a bridge."

A list of all locally owned bridges in Michigan has been posted on the Michigan Department of Transportation's (MDOT) web site: http://www.michigan.gov/documents/mdot_Local_Bridge_Data_for_FSR_and_Call_for_Applications_148254_7.pdf. This list includes the Federal Sufficiency Rating (FSR) value for each bridge. Replacement projects must have an FSR value between 0 and 50 to be eligible for the Local Bridge Program. Rehabilitation projects are eligible provided their FSR values are between 0 and 80. Preventive Maintenance work is eligible for all bridges. The specific work being applied for in preventive maintenance and rehabilitation categories must be listed in the application.

Enclosed is a 2009 scoping document which indicates per unit cost estimates of various rehabilitation and preventive maintenance options. This will be helpful in determining the estimated construction costs for different types of repairs. All estimates for projects to be constructed in 2012 should incorporate an annual inflationary factor of four percent. If the structure is over a railroad, include the railroad's flagging and construction fees.

Replacement:

Replacement projects involve replacing the entire substructure, superstructure, deck and necessary approach work.

For replacement projects, at a minimum, the average cost per square foot of proposed deck area should be estimated at \$200 for rural roadways and \$220 for urban roadways. If a multi-use path or sidewalks are planned but do not currently exist, the estimate needs to clearly indicate the costs of these items. If the project is selected for funding, a master plan showing the path or sidewalk must be provided in order for them to be considered participating within the Local Bridge Program.

The approach costs should be estimated using, at a minimum, \$25,000 per station with a minimum approach cost of \$100,000. The estimate needs to account for public utilities, such as water mains and sewers, which will need to be altered during construction. Also, if the structure is within a substandard horizontal or vertical alignment, be sure the estimate accounts for the increased approach distance.

Replacement projects need to meet the current American Association of State Highway and Transportation Officials (AASHTO) guidelines and the Load Factor Resistance Design (LRFD) criteria. The minimum overall estimated cost for a replacement project including approach work should be \$300,000.

Rehabilitation:

Based on the federal Highway Bridge Program (HBP), rehabilitation is defined as "The major work required to restore the structural integrity of a bridge as well as work necessary to correct major safety defects." These projects are required to meet the AASHTO guidelines. If a rehabilitation project is over water, a scour analysis will be required during the design phase and the existing foundations will need to be shown to be stable under a scour event. A structure that is found not to be stable during a scour event may not be allowed to proceed to contract. If making the structure stable results in a change in scope, it may be necessary to re-apply during a future call for applications.

For bridge rehabilitation projects, the estimated repair costs will vary by the type of work. Include publicly owned utility relocation costs. Examples of rehabilitation work eligible for funding under the program are:

- Full deck replacement (with or without painting of steel beams)
- Superstructure replacement
- Structure widening
- Demolition of existing bridge

Preventive Maintenance:

Preventive Maintenance activities are eligible under the Local Bridge Program. Examples of Preventive Maintenance are:

- Painting only (full, zone, or spot painting)
- Pin and Hanger replacement
- Slope paving repair
- Joint replacement and repair
- Drainage system repair (bridge deck drains and bridge approach downspouts)
- Scour Countermeasures
- Concrete crack sealing
- Concrete patching and repair
- Approach pavement relief joint installation
- HMA overlay

Mr. John D. Niemela and Mr. David Worthams
Page 3
February 4, 2009

Shallow deck overlay (removing and replacing concrete surface above the top mat of steel reinforcement)
Deep deck overlay (removing and replacing the concrete surface below the top mat of steel reinforcement)
Temporary Supports
Expansion or Construction joint repair
Guard Rail Beam retrofit or installation

The data found on the Structure Inventory and Appraisal (SI&A) form is used in many of the formula rating point calculations and is one item looked at by your Region Bridge Council when considering discretionary rating points. It is very important that this data be current and correct before submitting the application; incorrect data may significantly affect the rating points. When completing an application, the data stated in the supporting documents must match the data found in the SI&A form. Conflicting information may be cause to reject an application.

MDOT bridge personnel will review submitted applications for completeness, check the eligibility based on the FSR requirement, and determine the preliminary (computer generated) rating points. Local Agency Program's bridge staff will perform site visits, verify appropriate scopes of work, and create written site reports. The applications, preliminary rating points, and the site visit reports will then be forwarded to the respective Region Bridge Council for their review and the addition of the discretionary rating points.

The preventive maintenance, structure rehabilitation and replacement, and approach construction costs may be eligible for a maximum of 95 percent participation from federal and/or state funds. The right of way, design engineering, and construction engineering costs are not eligible for Local Bridge Program funds.

The Local Bridge Advisory Board (LBAB) has set a policy for projects coming in over application estimate. If, at the grade inspection stage, the project estimate exceeds the application estimate, the Region Bridge Council may review the project. The council can decide to accept the project at the increased estimate, cap the project at a percentage above the application estimate, or delay the project until the following year. Please take due diligence in getting the most reasonable application estimates.

All applications must include the requirements listed on the enclosed pages. All bridge applications submitted in previous years that have not been selected for funding have been discarded. The Region Bridge Councils and the Local Bridge Advisory Board will only consider applications submitted during the current year's call. Incomplete applications will be rejected and will be returned to the local agency.

Applications must be postmarked **no later than June 1, 2009. Applications postmarked after June 1, 2009, will be rejected and returned to the local agency.** We encourage you to submit your applications early if they are complete.

If you have any questions, or need further information, please contact Mr. Mark C. Harrison, Bridge Program Manager, at (517) 373-2346.

Sincerely,

Mark A. Van Port Fleet
Engineer of Design

Enclosure

APPLICATION REQUIREMENTS

(Standard and Emergency Applications)

1. Include the most recent Structure Inventory and Appraisal (SI&A) form and Bridge Inspection form (BIR). These forms must have been updated within the 24-month period, prior to June 1, 2009. The data found on the SI&A form is used in many of the formula rating point calculations and is one item looked at by your Region Bridge Council when considering discretionary rating points. It is very important that this data be current and correct before submitting the application; incorrect data may significantly affect the rating points. The SI&A and BIR forms must be updated electronically on MBIS prior to the June 1, 2009, deadline. Do not send in any marked up forms as we can not update the data for you.
2. Submit a legible map (8 ½" X 11") showing:
 - a. Emergency facilities such as fire stations, hospitals or police stations.
 - b. Schools and other significant traffic generating facilities.
 - c. The alternate routes or detours which must be used as a result of load limits or closures.
 - d. Do not color code this map, it will be reproduced on a black and white copier.
3. For all applications, include a minimum of two photographs of the following:
 - a. One showing the structure's alignment.
 - b. One showing the structure's profile view.
 - c. If the bridge is posted, include one photograph of the bridge clearly showing the current posting sign. These photos need to be of good quality in order to reproduce copies on a black and white copier.
4. For **rehabilitation** and **preventive maintenance** applications, also include photographs of the following:
 - a. The deck showing the areas of delamination and patches.
 - b. The substructure units showing areas of delaminations/spalls.
 - c. The beams showing areas of cracks and delamination for concrete and local areas of corrosion and/or local failure for steel.
 - d. The photos need to be of good quality in order to reproduce copies on a black and white copier.
5. Submit a narrative which includes the following:
 - a. The responsible local agency contact person's name, title and telephone number.
 - b. **Clearly indicate whether the application is for rehabilitation, replacement, and preventive maintenance. For rehabilitation and preventive maintenance, clearly specify work requested for funding.**
 - c. A statement explaining the economic importance of the structure.
 - d. In a short paragraph, if there is currently a detour for the structure, explain "Existing detour currently affects"
 - e. In a short paragraph, if the structure is or would be closed, explain "If the structure is closed, the detour would affect...."
 - f. If the structure is closed, what year the structure was closed.
 - g. A statement of any maintenance done on the structure either past or present.
6. Submit a breakdown of the estimated replacement, rehabilitation, and preventive maintenance as follows:
 1. Right of Way (if any) (1) \$ _____
 2. Design Engineering (2) \$ _____
 3. Construction Engineering (3) \$ _____

Total (1,2,&3)	Total	\$ _____
A. Approach Construction	(A)	\$ _____
B. Structure Construction	(B)	\$ _____
Total (A & B)	Total	\$ _____

7. Submit a **"Priority List"** listing all the structures that you want rated. Any application not containing a total priority list of all applications will be considered incomplete, and will be rejected and returned to the owner.
8. **For each application**, submit a current resolution, signed and dated, from the governing board supporting the project. Resolutions from previous applications will not be accepted. Letters of local support are recommended but are not mandatory.
9. Do not staple the application together or put in a booklet or binder, as it needs to be reproduced on a black and white copier.
10. Any application that is not complete will be rejected and returned to the local agency. Common examples of incomplete applications are those that are missing updated SI&A forms, photos of postings, load ratings, missing resolutions, and priority lists. A complete application must be postmarked by the June 1, 2009, deadline.
11. All applications must have a Federal Sufficiency Rating, FSR, value between 0 and 100. A list of all locally owned bridges in Michigan with their respective FSR values has been placed on MDOT's website. For replacement projects, the FSR value must be less than 50. For rehabilitation projects, the FSR value must be between 0 and 80. All bridges are eligible for preventive maintenance.
12. Previous years' applications have been discarded. The Region Bridge Councils and the Local Bridge Advisory Board will only review applications submitted during the current call for applications. After the applications have been reviewed and projects have been selected for funding, all non-funded bridge applications will be discarded.
13. Clearly indicate whether the application is for rehabilitation, replacement, or preventive maintenance. For rehabilitation and preventive maintenance, clearly specify the work requested for funding.

All applications must be submitted directly by the **LOCAL AGENCY** (not their consultant) to:

Rita Levine
 Local Agency Programs-Design Division, MDOT
 425 West Ottawa Street
 P.O. Box 30050
 Lansing, Michigan 48909
 Phone: (517) 373-0041

STR. TYPE:

WORK ITEM	QUANTITY	DIMENSION	UNIT COST	TOTAL
NEW BRIDGE				
Multiple spans, Concrete (add demo. & road approach & traffic control)		SFT	\$135.00 /SFT	
Multiple spans, Steel (as above)		SFT	\$155.00 /SFT	
Single span (or multi span over water), Concrete (as above)		SFT	\$160.00 /SFT	
Single span (or multi span over water), Steel (as above)		SFT	\$180.00 /SFT	
Pedestrian Bridge (includes removal, add traffic control)		SFT	\$240.00 /SFT	
Other				
NEW SUPERSTRUCTURE				
Concrete (includes removal of old super & new railing, add traffic control & approach)		SFT	\$110.00 /SFT	
Steel (as above)		SFT	\$135.00 /SFT	
Over Water (add to new superstructure cost)		SFT	\$25.00 /SFT	
Other		SFT	\$137.50 /SFT	
WIDENING				
Added portion only. _____ ft of width (add road approach widening)		SFT	\$175.00 /SFT	
Other				
NEW DECK				
Includes removal of old deck & new railing (add traffic control & approach)		SFT	\$70.00 /SFT	
Other				
DEMOLITION				
Entire bridge, grade separation		SFT	\$27.00 /SFT	
Entire bridge, over water		SFT	\$35.00 /SFT	
Other				
SUPERSTRUCTURE REPAIR				
Concrete Deck Patch (includes hand chipping)		SFT	\$39.00 /SFT	
HMA Cap (no membrane - add bridge rail if req'd)		SFT	\$1.40 /SFT	
HMA Overlay with WP membrane (add bridge rail if req'd)		SFT	\$4.60 /SFT	
Removal of Concrete Wearing Course (latex) or Epoxy Overlay		SFT	\$3.00 /SFT	
Removal of HMA Overlay		SFT	\$1.00 /SFT	
Epoxy Overlay		SYD	\$32.00 /SYD	
Shallow Overlay (includes joint replmt & hydro, add bridge rail if req'd)		SFT	\$25.00 /SFT	
Deep Overlay (includes joint replmt & hydro, add bridge rail if req'd)		SFT	\$26.00 /SFT	
PCI Beam End Repair (\$2000-\$4000 per beam end)		EA	\$3,000.00 EA	
Repair Structural Steel (\$2400 bolted, \$6200 welded)		EA	\$5,000.00 EA	
High Load Hit Repair (PCI Beam)		SFT	\$210.00 /SFT	
Paint Structural Steel		SFT	\$9.00 /SFT	
Partial Painting		SFT	\$18.00 /SFT	
Pin & Hanger replacement (includes temporary supports)		EA	\$7,650.00 EA	
Other				
SUBSTRUCTURE REPAIR				
Pier repair (measured x 2) Replace unit if spalled area > 30%		CFT	\$300.00 /CFT	
Pier repair over water (measured x 2)		CFT	\$350.00 /CFT	
Pier replacement		CFT	\$68.00 /CFT	
Abutment repair (measured x 2)		CFT	\$300.00 /CFT	
Temporary Supports for Substructure Repair		EA	\$1,850.00 EA	
Slope Protection repairs		SYD	\$65.00 /SYD
